

Apex Growth Discovery Agent

100% Passed

Retell AI Production Architecture & Simulation Validation Report

1. Executive Summary

The **Apex Growth Discovery Agent** is an automated B2B consultative intake specialist engineered using Retell AI. It qualifies inbound leads for Apex Growth Marketing by assessing current challenges, marketing channels, growth goals, budgets, and timelines across a structured 5-stage conversational workflow equipped with robust objection handling and stop conditions.

2. Core Agent Architecture & 5-Stage Workflow

Stages 1 to 3: Intake & Qualification

Opening: Warm greeting and 10-min consultation framing.

Discovery: Single-turn questions probing drivers, channels, and 6-month success metrics.

Budget & Timeline: Qualifies financial scope, start date, and decision-making authority.

Stages 4 & 5: Objections & Closing

Objection Matrix: Resolves price and agency resistance without premature termination.

Closing: Summarizes requirements, secures strategy call times with human executives, and executes clean call termination.

3. Simulation Test Suite Results (5/5 Verified)

Test Case Name	Validation Objective	Status
Happy Path Discovery	Greets warmly, confirms company, asks single-turn questions sequentially.	Passed
Price Objection	Acknowledges cost concerns politely, avoids pricing quotes, reframes around goals.	Passed
Already With Agency Objection	Addresses existing setup, asks satisfaction level, offers low-commitment comparison call.	Passed
Vague Answer Fallback	Extracts core context from compound answers and transitions smoothly.	Passed
Explicit Decline Stop Condition	Delivers polite closing line and immediately invokes the end_call tool.	Passed
